

Emergency Broadband Benefit Program

The Emergency Broadband Benefit (EBB) program is a government program intended to reduce the broadband internet service bill up to \$50.00 per month per household.

Qualified applicants may obtain broadband service supported by the EBB program from any participating provider and may transfer the EBB program benefit to another provider at any time.

The EBB program is temporary. It will conclude when the funds are exhausted or six (6) months after the Department of Health and Human Services (HHS) declares the end of the COVID-19 public health emergency. At that time, EBB program participants are subject to their provider's undiscounted rate and general terms and conditions if they continue to receive broadband internet service.

Current Lifeline benefit customers may authorize their provider to enroll them in EBB. Additional information about program details can be found at <https://www.fcc.gov/consumer-faq-emergency-broadband-benefit>.

Twin Valley Telephone is an authorized EBB provider. As a current Lifeline benefit customer, I hereby consent to opt-in and authorize Twin Valley Telephone to enroll me in the Emergency Broadband Benefit Program.
